EX0915 Personal Safes

- Available in Black or Camouflage
- Cover opens automatically when you enter your code
- Light enough to be easily carried
- Two mounting plates included
- Simple mounting system allows you to install mounting plates on a variety of surfaces. Easily removed from the mounting plates with proper entry code.
- When lock is closed, incorrect entry code will be rejected and a buzzer will sound. A third incorrect code starts a 5-minute timer, during which no codes will be accepted.
- When any key is pressed, the keypad lights up
- Operates on 4 AA batteries
- Features a low battery alarm & mechanical override key.

Interior: 7³/₄ H x 10¹/₄ W x 2³/₄ Deep
 Exterior: 9" H x 15" W x 3¹/₂ Deep
 Weight: 16¹/₂ lbs.

How to Pick the Right Adesco Safe:

- **Pick your safe's location.** In the floor, in the wall, in a closet, or free standing.
- **Pick your size.** What will go into the safe? Papers, jewelry, cameras, firearms, cash, etc. Plan for plenty of room here. It is cost effective to invest in a larger size now than to run out of space later.
- **Pick your level of security.** B-rate, C-rate, TL-15, TL-30, or fire safe.
- **Pick your door.** Deposit slot, key or combination.

Small Business Deposit Safes

Mini-Safe Set, Single nose

- Ideal for cash-based businesses
- Compact size and easily mounted
- Installation allowed near cash registers to permit frequent cash drops.
- Key lock
- Graphite finish
- Solid formed steel body

FIREPROOF INSULATION
is 100% gypsum, reinforced by a 1" by 2" lattice made of 14-gauge galvanized welded steel wire, providing complete peace of mind from fire, impact, or explosion.

FIELD REPLACEABLE STEEL PANELS
can easily be replaced in the event that any panel is damaged.

FINISH
is an environmentally-friendly electrostatic powder coating applied to all sides, including bottom. The finish is scratch-resistant, providing a lifetime quality appearance.

DRAWER BODIES
are built with high sides for use with hanging folders – no additional frames are needed.

DRAWER SUSPENSIONS
are maintenance free and are guaranteed for life.

DRAWER LOCKS
on all files provide general locking of all drawers through either standard key locks or UL®-listed high-security locks.

DRAWER PULLS
are surface mounted to allow for extra insulation inside the drawer heads.

INSULATION BETWEEN ALL DRAWERS
makes each drawer a separate insulated container.

2-POSITION DRAWER CATCH
allows access to certain drawers while others remain locked.

DRAWER HEADS
are formed of welded steel and filled with fireproof insulation, and are field replaceable.

UNDERWRITERS LABORATORIES® (UL®) FIRE & IMPACT RATING
on all file cabinets.
See back for details.

PRO-LOK®

Slotted Electronic Safes

When the door is locked, deposits can be made via a deposit slot. Sometimes referred to as "trim safes" they are designed to reduce the risk of robbery by limiting the amount of money in the cash register. These safes are not meant for unprotected overnight storage of cash or valuables. Depository safes are recommended for any operation that requires a non-returnable deposit such as armored car companies, convenience stores, restaurants, gas stations and other businesses. This safe is designed for small businesses or vehicles which need to store cash or receipts until the daily bank deposit.

- Weight: 35 pounds.
- Storage capacity: 1150 cubic inches
- Easy to program & change your own combination in seconds.
- Electronic security lock.
- Solid steel construction
- Manual override key function.
- 4 bolts provided to anchor the safe down.
- 2 steel locking bolts for added security
- 4 AA Batteries included to operate keypad.
- External Dimensions: 13-2/3" W x 10" D x 10" H

Sargent & Greenleaf

S&G Model 2937 Mechanical Safe Locks Meets United States Federal Specification FF-L-2937

Sargent and Greenleaf safe locks have been protecting the assets of banks, businesses and governments for almost 150 years. The S&G 2937 lock represents the latest design advances to produce a mechanical lock to secure certain types of GSA approved containers, such as field safes, armory vault doors, weapons containers, and similar items.

Based on the 8550 platform, but with significant modifications necessary to meet the FF-L-2937 specification. Two modifications are the 2937's stainless steel bolt and a spindle, which has two carbide pins. In addition, the end of the bolt has two drilled/tapped holes for bolt work attachment, required by the specification.

The FF-L-2937 must be used on the following GSA approved products:

- Weapon Container - specification number AA-C-2859.
- Weapon Vault Door - specification number AA-D-600D (Class 5A, design S).
- Field Safe - specification number AA-F-358H (Class 6, Size VIII).

Product Features

- The only lock approved to meet Federal Specification FF-L-2937.
- Based on the time tested S&G 8550 platform.
- Three all-metal wheel construction.
- Special spindle containing two carbide pins for added punch & drill protection.
- Spy-Proof Dial.
- Familiar left-right-left dialing sequence
- Twenty man-hours of resistance to expert manipulation.
- Built in thermal protection provided in integral thermal relock component.
- UL Group 1; Federal Specification FF-L-2937
- Key changeable wheel design for simple combination changing.
- Stainless steel bolt meets specification to resist 600lbs. force.
- Bolt end contains two drilled/tapped holes to meet the federal specification.
- S&G's patented torque adjuster allows precise setting and maintenance of wheel pack torque.
- Uses the S&G "Magic Module" footprint for easy retrofit.

Sargent & Greenleaf

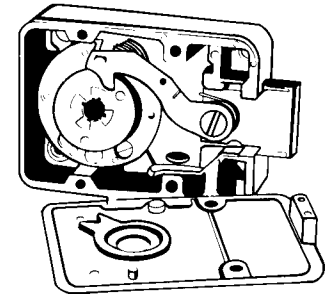

Key Changing R Series. 3-Wheel, Relock.

UL Group 2 Rated. Suitable for use on insulated safes, record containers, strong boxes and light vault doors. Combination can be changed by the use of a special key while dialing the new combination to a special changing index on the dial. Non-tube 3-wheel, offers up to one million different combinations. Supplied with a 4-way drive cam which allows for mounting in right or left hand, vertical-up or down positions. Relocking trigger automatically deadlocks the bolt if entry is attempted by punching the spindle or lock case. Dimensions: 3.25" wide x 2.30" high x 1" deep. Weight: 1 lb. 1 oz. D300 Dial & R211 Ring.

8550 MP Manipulation-Proof

UL Group 1 & 1R. Offers true high security along with simplicity and ease of operation. Equipped with a special relock trigger which automatically secures the lock if the spindle is punched. A thermal relock device also protects against entry by the application of heat. Utilizes S&G's Spyproof dial and ring (D54 & DR162). Torque Adjustment makes it possible to adjust dialing torque to individual touch with the use of an allen wrench. This feature also adds additional security by enabling precise torque pressure to be applied to the wheelpack. Three brass wheels offer one million combination changes. Constructed of rugged die cast Zamak and meets US Government specs.(MIL-L-15596-E, Type I and II). Dimensions: 3.25" wide x 2.30" high x 1.10" deep. Weight: 1 lb. 2.5oz. D054 Dial & R162 Ring.

SRG-6804

Key Operated Lock

This key lock matches the installation of 6700, 8400 & 8500 series. It is a blend of security and convenience. For inner compartmental and outer safe doors, furniture, filing and office equipment. Changeable using a standard allen or hex wrench. Seven levers with false gates provide pick resistance equal to locks used in safe depositories. The lever stack forms an internal shroud around the key so that the lock is difficult, often impossible to "read" with all modern optical burglary tools.

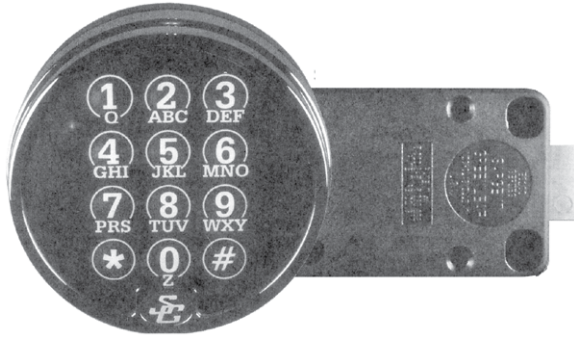

Single Bit, w/ 2 keys. Key Retaining.

Dimensions: 3 11/32" x 2 13/32" x 1 7/64"

Sargent & Greenleaf

Electronic Combination Lock Model 6120

The market for upgrading or retrofitting existing safes with electronic locks is virtually untapped. From the customer's perspective, electronic locks offer several distinct advantages over mechanical safe locks. S & G's 6120 offers a secure, dependable, easy to use lock that looks as good as it works.

Ease of Operation. Its like dialing a touch tone phone.

Fast Opening. Elimination of fourturnsleft, three turns right, etc.

Easy Combination Changing. All operations are easily carried out from the keypad with no tools required..

More Security. Even a very good three-wheel lock only offers about 150,000 distinct combinations. The 6120 offers a true one million.

LOCK BODY ONLY: Square bolt

Bring Your Safe Locks Into the 21st Century with Flexible Fingerprint Security

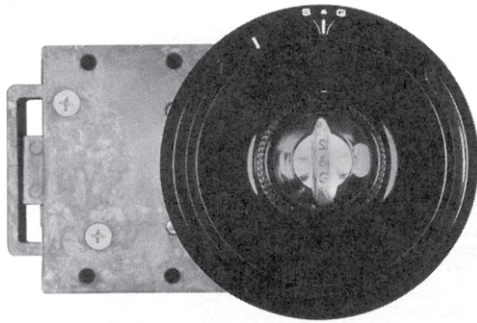

The S&G Biometric Keypad is a replacement keypad that works with many Sargent and Greenleaf electronic safe locks to provide a whole new level of security and convenience. Its unobtrusive, easy-to-use fingerprint reader lets you operate your lock by authorized fingerprint alone, or by code and fingerprint.

Special Keypad Features:

- Designed for a quick, easy retrofit upgrade on many existing Sargent and Greenleaf electronic safe locks.
- Diameter and mounting screw locations are the same as for most other S&G electronic safe locks.
- Top-mounted fingerprint reader is easily accessible.
- Front-mounted backlit LCD guides you through the process of enrolling fingerprints and programming the keypad functions.
- You select the level of security and convenience. Allows your safe lock to be opened by:
 1. Fingerprint only
 2. Fingerprint and PIN code
 3. PIN code only
- Enroll one fingerprint for each PIN position in the lock.
- Quickly remove authorized fingerprints from the system when necessary.
- Integral battery compartment makes battery changes a snap.
- Individually boxed.

8415-007-8470

8415-107 Premium Security Products Extension 50 Deadbolt

Reversible, surface-mounted lock. For use on doors in high security areas. Two locks in one: a deadbolt and a combination lock.

The Deadbolt

Includes hardened steel pins and interlocking strike and frame to prevent jamming or spreading of the door frame. Equipped with inside release knob for convenient exiting and automatic deadbolt trigger that locks for extra security. Can be set in the locked position while the door is open. Positive locking when the door is closed. Has LOCKOPEN latch, dial can be locked in unlocked position, easing traffic flow without delays.

The Combination Lock

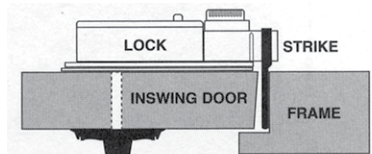

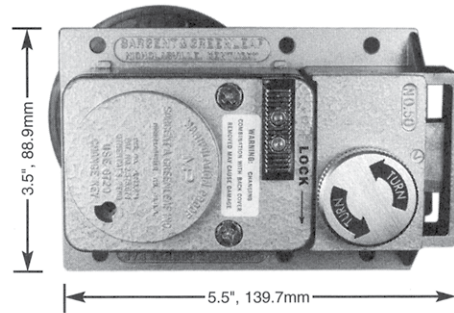

Manipulation-proof to protect against attack, up to one million easily changed combinations. Standard relocking trigger automatically deadlocks the unit if the spindle is punched. Inner workings made of brass, and spyproof dials and rings are standard.

U.L. Listed Group 1 & LR security rating testifies to reliability & performance. Meets military specification MIL-L-15596-E.

Dimensions: 5-3/8" long x 3-7/16" wide. Weight: 2.75 lbs.

U24 Tube Kit

A tube must be used with any lock mounted on an insulated safe that does not provide a barrier between the lock's spindle hole and the safe insulation. The tube prevents insulation from infiltrating the lock through the spindle hole.

The U24 kit is used to add a spindle tube to any current production 6630, 6730, 6741, or 8500 series lock. Will accommodate a maximum door thickness of 3.4 inches.

Combination Lock

from Sargent & Greenleaf

Model 6741

UL Group 2, Combination Safe Locks

This value priced combination lock uses the "magic module" mounting footprint and general design of the 6730 making it interchangeable with the 6730. Uses the 6730 relock trigger assembly, brass bolt, brass 4-way drive cam, metal wheels, spacer washers, brass lever screw and the Spirolox wheel pack retainer.

Components unique to the 6741 include: a one-piece diecast zamac lever, stamped brass wheel flies, single-locking wheel design, wave washer torque control device, diecast wheel centers, 620L clear coat case finish and a one year warranty.

With front reading D300 dial and R211 ring:

Auditcon Lock Series®

The **52 Series** is a stand-alone single combination access control lock with a dual mode function that provides a small business or individual with the convenience of electronic lockins.

**KABA
MAS**
THE SOURCE FOR SAFE LOCKS

The **Auditcon 100/200/300/400/500 Series** is U.L. Type IR rates. It easily replaces traditional mechanical Group I and Group II locks, upgrading the security of any safe or archive storage unit. Auditcon is perfect for security applications where shared access and audit capacity is necessary.

The **Auditcon 2100** is designed with basic operational programs and a variety of programming options. It can be used as a stand-alone safe lock, or when used with its proprietary PC software, as a sophisticated, electronic security system. Plus, it retrofits obsolete, mechanical dial locks to restore the integrity of your safe.

Auditcon® Lock Series

The best deterrent to insider theft is the certainty of discovery. With Auditcon®, discovery is inescapable.

Utilizing the innovative, award-winning PowerStar™ technology, Auditcon's security cannot be compromised by outside manipulation and provides unprecedented audit capability.

Features and Benefits

PowerStar™ Technology. Self-powered. No batteries, no wiring, no maintenance

Access Control. Models with SmartKey capability offer dual-level security that requires a four digit PIN and personal encoded key to gain access.

SmartKeys. Allows convenient data download and transport for PC viewing.

Audit Trail. User's ID is recorded every time the lock is opened.

Touch Key Number Pad. Change, add or delete PIN combinations with the touch of a button.

Wrong Try Lock-out. Hackers are locked out after 5 wrong combinations.

Economical Replacement. Utilizes the same footprint as most conventional mechanical combination lock.

Time Delay. Delay entry for 1 to 99 minutes.

Time Delay Display. LCD displays the time, informing the user when access will be granted.

Battery Assist for Time Delay (T52 only). 9-volt battery will continually flash the LEDs throughout the duration of a Time delay or Open Window Period.

Dual Mode. Requires the combination and/or Smart keys of two users to gain access.

Silent Duress Alarm. (100-2100 Models). Safely lets employees comply with intruder's demands while alerting authorities.

Quick and Easy Entry. Can be opened in seconds with the correct combination.

Windows 98/2000/NT/ME Software. Optional Audit Only software allows you to save or print audit trail information from your PC. The 2100 model can be fully programmed using the Auditcon 2100 software package.

Choice of Bolt Designs. The "Slide Bolt" automatically locks when the safe handle is closed. The standard "Dead Bolt" functions like a traditional mechanical combination dial lock.

Technical Support. Kaba Mas Technical Support Staff is available 24 hours a day, seven days a week. Call 800-950-4744.

Auditcon Lock Series®

Businesses that have multiple employee access, multiple locations, absentee ownership, or high employee turn-over are ideal for Auditcon locks. Auditcon locks can secure safes, containers, vaults, and restricted areas for Restaurants, ticket box offices, Convenience stores, Grocery stores, department Stores, Drug stores, Jewelry stores, Banks, Hospitals, Casinos, Police Stations, etc.

X-09™ High Security Locks

Meets FF-L-2740A

Make your safe the safest with the X-09, electromechanical lock. Approved by the GSA for use on approved Class 5 and Class 6 filing cabinets and Class 5 and Class 8 Security vault doors. Self-powered using PowerStar™ technology (an internal self-activating power-plant), and features a limited view LCD display.

A twist of the dial provides all the power necessary to enter the combination, as well as review audit features. The X-09 provides all of the benefits of high-security electronic locking while maintaining the reliability of a mechanical lock, independent of batteries or outside power sources. It's security with a twist.

Since the X-09 is not subject to mechanical limitations, it provides a far superior solution for your container needs. The tamper-resistant X-09 can not be "hacked" because the digital information is hidden in the processor's non-volatile memory.

Three Modes of Operation

- **The Single Combination Mode**, allows access by dialing a six-digit combination.
- **The Dual Combination Mode**, allows access only when two separate codes are entered within 10 seconds of one another.
- **The Supervisory/Subordinate Mode**, allows access by a subordinate only after a supervisor code has been entered.

Audit Feature

The X-09 has a full compliment of auditing features, including non-resettable openings log, and unsuccessful attempts log (audits after 3 unsuccessful attempts) that resets once the proper access code is entered.

PowerStar™ Technology

Generates its own electrical energy with each turn of the dial. No batteries, wires or hassles. Its's electronic access control - with a twist.

Combination Changes: LCD indicators in change key mode.

Random Number View: True Scramble

Daylocking: No

Back Dialing: No

Lock Reset: Automatic when bolt is thrown or 40 seconds after turning has stopped.

Combinations:

Single Mode: 1 million

Dual Mode : 500 billion

Supervisor/Subordinate Mode: 2 million

Direct Dial: No need to clear before entering combination.

Dead Zones: None

LCD: Limited View Liquid Crystal Display with indicator arrows makes dialing easy and exact.

X-09 Combination Locks

Order #	Item #	Catalog Price
547-0007	X09S-RD-00N-Z-J-E-1A	\$2047.50
547-1005	X09S-RD-00F-Z-J-E-Z-A1 with Flush Bolt	\$1950.00

Combination Door Unit

Integrated with a rim deadbolt platform, the X-09 represents a unique and complete high security door lock solution while complying with most safety requirements. Along

with the X-09, the combination door lock unit is added to form the CDX-09 which allows you to have access control on any door. Conforms to FF-L-2890.

Dependability has never been so easy and affordable.

The Kaba LC Series

Comes with an exclusive spindleless slide bolt and features multiple user capability.

The LCLX is a breeze to install, program and operate, and offered at a very affordable price.

Field Programmable Functions

Single Mode. One combination is required to open lock, Manager (User) or User 2. Manager must add and enable User 2.

Dual Custody Mode. Both user 1 and user 2 combinations are required to open lock.

Super Master Control. A 6-digit code is used to reset lock to Factory Defaults (optional)

All functions are field programmable. A Wrong Try lockout Penalty of 3 minutes will start after 5 wrong combinations are entered.

Certifications: UL Type 1 listed; VdS Pending
EnV1300 Pending

LCLX Housing is Lexan with Black faceplate.

PowerSaver circuit utilizes a 9-volt alkaline battery where power lasts virtually for the shelf life of the battery.

Memory. Programmable nonvolatile Flash memory for 1 or 2 users.

Applications. The UL type 1 rating allows many different application types. For retrofit applications, the Slide bolt Lock body can be mounted over the spindle hole. Bolt works must be present to drive slide bolt.

Cencon System 2000® ATM Locking Systems

The Cencon System 2000 is designed to combat insider theft from ATMs through the combined use of lock hardware, systems software and Smartkeys. Total access control and accountability with its One Time Combination feature. The One Time Combination is dispatched from a central location and cannot be reused at a later date, thus eliminating temptation.

Unique software allows you to control and monitor tens, hundreds, even thousands of locks located anywhere in the world - from one central location. A revolutionary and cost-effective solution to today's most serious challenges.

Features and Benefits

Access Control. A user needs both a One Time Combination and a SmartKey to access the lock.

A **One Time Combination** is dispatched each time access is required to a container controlled by a Cencon lock.

SmartKey. An encrypted electronic key, used as a personal identifier, programming device or to transfer data between system components.

Close Seal acts as an electronic signature, stamping the date and time showing the lock was locked and secured.

Duress. When combined with a connection to an alarm system, entering a special "Duress" Combination will automatically send a silent alarm.

Bolt Switch. Comes standard with the capability to connect an alarm system to monitor the position of the lock bolt.

Alarm Shunt Operation. Compatible with most alarm systems.

Audit Trail. Records all lock activity up to 956 events, and permits easy downloading of the information via a SmartKey for generating detailed audit reports.

Easy Retrofit. Same footprint as conventional mechanical combination locks.

User Friendly Software. Allows you to control hundreds of containers with no special wiring. The Windows 95/98 point-and-click interface makes it simple to install and use.

Dial & Keypad
3.79" H x 3.83"
W x 1.38" D

Lock Body
2.4" H x 3.34"
W x 1.19" D

PowerStar Technology

Use of an internal generator creates all the necessary power. No batteries or external wiring required.

Three Modes of Operation.

Cencon locks can operate in any of three modes - one for the First Line Maintenance personnel (FLM Mode), one for cash replenisher or armored service (Route Mode), and one for bank employees (Bank Mode). Each mode addresses the individual access needs for each category of user. Cencon System 2000 locks can be operated in any of these three modes - individually or in combination.
