ABUS

Re-Keyable Diskus Padlocks. 24/70RK

The first round

Diskus design in a re-keyable version. Cylinder can be removed and reinstalled in seconds. The cylinder housing is double bolted when the shackle is in the locked position to ensure it stays in the lock at all times. Can be rekeyed to virtually any Abus 41 Series laminated lock, 28 Series Buffo, 24 Series Diskus. The new 5-pin cylinder ensures thousands of key differs for unique master keyed systems

ABUS BUFFO Security Padlock

ABU-28ST/70. Stainless steel with 10mm case hardened steel shackle. Brass, 4 pin tumbler cyl. Same as the Diskus 24ST/70 padlock (listed below), but inside mechanisms are not stainless steel.

ABUS

83/45, 83/50, and 83/55 Padlocks

- ISO 9002 certified production.
- Double ball bearing locked shackle for high tensile and torsion strength.
- Specially coated locking balls have been tested and found to resist rusting for months when submersed in salt water.
- Stainless steel drive bolt spring.
- Easy shackle change feature is built into the drive bolt. The shackle can be changed without taking the lock apart. Simply turn the drive bolt 90 degrees and the shackle is removed.
- New Nylon patch on screw threads prevent the screw from coming loose from vibration.
- Chrome plated shackles ensure excellent rust protection on every lock.

83/55 • Solid Steel Body, 2-1/4" Wide
• Thick 7/16" Special Alloy shackle

83/50 • Nickel Plated Brass Body and Cylinder
• 2" Wide Body
• 3/8" Shackle

83/45 • Solid Brass Body, 1-3/4" Wide
• Automatic Locking

ABUS Convertible Rekeyable Pin Tumbler Padlock

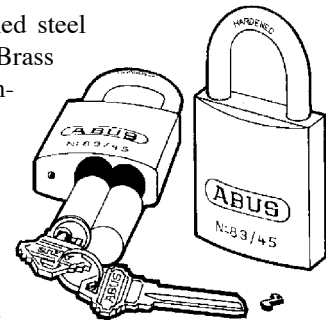

The most versatile, pin tumbler padlock you've ever seen. The Z-Bar makes the difference.

Using only a Phillips #2 screwdriver, the 83 Series padlocks converts to either a key retaining or non-key retaining padlock. This means that in just one lock you have the instant capability to meet your customers needs for either type. With the Z-bar in place, the lock is key retaining, lift out the Z-bar and the lock is non-key retaining.

83/45

- 1-3/4" body with hardened steel double locking shackle. Brass high precision 6-pin tumbler cylinder. O-bitted
- Converts in seconds to key retaining or non-key retaining mechanism.
- Dramatically reduces inventory.
- Gives you the convenience of key into most of the popular door locking systems on the market today.
- One key opens both door lock and padlock.
- Provides flexibility in building a totally new padlock system for any installation.
- Superb quality workmanship and materials. Provides most outstanding value in convertible rekeyable security.

800 Hasps

APPLICATIONS

- Panel Vans • Trucks
- Other Transportation Vehicles

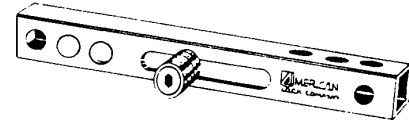

Hasp Length: 4-1/2"
Hasp Width: 8-1/2"

Model 800: Hasp only

- 3/16" Steel Plate
- 3/16" Steel Shroud
- Double Plated
- Continuous Weld on Shroud
- Carriage Bolt Mounting
- Boxed (hardware not included)

It's unique design offers maximum vehicle protection and security. The zigzagged design prevents entry by making it hard to pry with a crowbar. The superior, double plated hasp resists corrosion. Combined with Model 2000 or Model 2010 shackless round padlocks by American Lock, it is one of the most secure vehicle hasps. The integrated chamfer makes it easy to install on any truck or van.

Order #	Item #	Catalog Price

Search Alert

Lock All of Your Checked Luggage Without Fear of Having Your Locks Cut Off. Luggage Locks

- Prevents Surreptitious Entry at Airports SearchAlert may be opened with a secured access device controlled by Transportation Security Administration (TSA) agents. No SearchAlert lock should be cut off by TSA agents.

- SearchAlert features a Security Window which changes color from Green to Red when any secured access device is used.

The Security Window shows RED

- When the TSA secured access device is used, the Security Window changes from Green to Red. The window also changes to Red if a counterfeit secured access device is used to open the lock.

- If a TSA agent hand searches the luggage, the agent will leave a TSA Notification of Baggage Inspection in the bag. If the window is Red, and there is no Notification, then the traveler should take the luggage to the airline's luggage claim office to determine if anything is missing, or if anything has been added to the luggage.

**Master Lock®
One Key System**

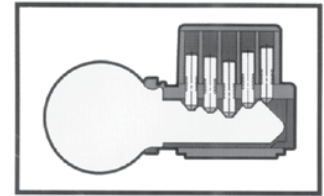

This section contains all Master padlocks and related cylinders, parts, and rekeying kits.

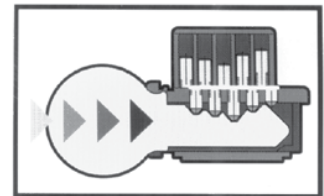

Universal Pin Keying System

Customers want their new padlocks to work with their existing keys. Until now, their options have been limited. They could find a retail outlet that carries a large inventory of locks to their key. Or they could order the locks and wait, or they could buy padlocks that don't match and add more keys, and confusion, to their key rings.

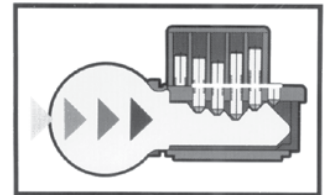

The Master Lock One Key System™ solves the problem. Now every padlock your customer buys can be keyed to their existing key - on the spot! In store custom keying of a Master Lock No. 1, 3 or 5 padlock can be performed in minutes. Patent Pending

Insert key into padlock cylinder.

Using the fixture, push the plug into the cylinder to shear the pins.

Continue pushing the plug into lock body. Padlock is now custom keyed.

Master Lock

The innovative Titanium Series padlocks by Master Lock represent consumer driven styling with enhanced performance.

The no-rust stainless steel body has an integrated high impact ABS bumper to protect locked items from scratching and marring. The convenient front access keyway, which allows single handed operation, has a patented sliding cover to keep dirt and grime from jamming the locking mechanism. The bolt cutter tough shackle shroud brings additional cut and pry resistance to the gear driven, rotary, hardened steel shackle. Additionally, Master Lock Company has fortified the lock with titanium for high-tech strength. Virtually undefeatable and yet stylish enough for any home and yard, automotove and outdoor application.

Titanium Series Padlock

Included two keys with matching colored keyheads.
 1-15/16" (49mm) Wide Body (W)
 2-7/8" (76mm) Overall Height (H)
 5/16" (7mm) diameter shackle. (A)
 5/8" (16mm) vertical & horizontal shackle clearance. (B&C)

Master Lock

Advanced Cylinder Technology

Lock bumping - a surprisingly simple method of breaking in through locked doors and padlocks - is undoubtedly the newest emerging threat to personal property security. And virtually all locks in use today are particularly vulnerable to bumping. Until now.

The Bump Stops Here!

As the world leader in security hardware, Master Lock has stepped forward to create a revolutionary new lock cylinder that is virtually bump proof and capable of detecting bump attempts.

BumpStop™ Advanced Cylinder Technology employs an innovative patent pending top pin design which has been specially engineered to resist bumping attacks. Unlike standard pins, it does not react to impact from a bump key and bump tool.

**PRO SERIES HIGH SECURITY, REKEYABLE,
COMMERCIAL USE PADLOCKS**

Tough BORON alloy steel shackles provide up to 16,000 pounds of shackle pull strength; include dual deadbolt locking for extreme resistance to prying.

Massive steel shackle guard repels saw & bolt cutter attacks. 5-pin cylinders with special pick resistant spool pins make locks virtually impossible to pick. Precision, removable cylinders & replacement shackles. Laminated steel pin

tumbler. 5-pin W6000 keyway unless noted otherwise. 7/8" horizontal and 3/4" vertical shackle clearance.

2-1/8" diameter body; 5/16" diameter shackle.

Patent Pending

**BLOCK
GUARD**
Anti-Shim Technology

- Hardened steel shackle resists cutting and prying
- Double-reinforced stainless steel case with cold-rolled steel construction shields locking mechanism from physical attack
- 3-Digit Dialing: Thousands of possible combinations
- Dial automatically locks under shackle tension to prevent "feeling out" the combination
- Combination automatically scrambles when closed to prevent accidental opening
- Fits lockers with a padlock eye of at least 5/16" diameter
- 1525 with key control / master key mechanism.

ADA Inspired Defined

Introducing our ADA Inspired locks: Our Mainstream Series.™ These locks are designed to be easy to use and assist those with physical or cognitive challenges operate a lock on their own. Please consult the chart on the right to help select an appropriate lock.

***ADA Compliance Defined**

As a subset of ADA Inspired locks, we also offer a line of locks designed specifically to meet the US Government 28 CFR Part 36 "ADA Standards for Accessible Design." These guidelines state the following requirements regarding locks for ADA use:

- Easy to grasp with one hand
- Does not require tight grasping, pinching, or twisting of the wrist to operate
- No greater than 5 lbs to operate

These locks achieve these requirements through the use of a specially designed keyhead and the simple operation of the lock. The large flat keyhead makes the key easy to grip for those with extreme joint pain. For those with clenched fist dexterity, the flat keyhead fits securely between their fingers. The operation of the lock can be achieved by a simple bumping action to the ADA keyhead to both open and close the lock without the need of tight grasping, pinching, or twisting. Also, the lock requires less than 5 lbs to operate. In practice, many of these locks are used in the field for ADA applications. View ADA student training videos at masterlock.com/school/training/product-list.html. As needs and requirements vary, please consult the local authority for use of any of these locks for a specific application.

1630 & 1636MKADA Built-In Combination Lock for Lift Handle Lockers

Product Features –

- Vertical travel locking bolt engages lift handle locker mechanism
- Convenient Automatic slam shut locking
- Fits all lift handle lockers
- Secure 3-number combination
- Lock contains 5 different combinations - maintains security for new users
- Control Key – Opens all locks in system, allows quick supervisory entry
- Order Control Key Separately
- End user registration and control charts provided to secure and simplify administration

Product # – List Price

1630 – \$17.14 each

KING PIN SECURITY

The Best Security for Your Trailer or RV

Prevent theft of semi-trailers and valuable cargo with the new Kin Pin Lock from Master Lock. The lock fastens to the king pin of an unattended trailer and blocks attempts to hook to an unauthorized tractor.

- Constructed of solid, cast aluminum alloy, the housing is engineered to withstand physical attacks, yet weighs only 6.5 lbs, making it easy to carry.
- Use with a Master #5 or #25 padlock (Order separately). The padlock is protected by the housing designed to resist common attempts to defeat standard locks
- No accessible shackle to cut.
- Handle makes it easy to carry, and keeps hands clean.
- Durable bright red powdercoat finish.

Uses Master #5 or #25 Padlock (Order separately)

Cable Locks

The World's First Fully Adjustable Locking Cable

Gone are the days of loose fitting cables. The exclusive, patented Python adjustable Locking Cables integrate a lock with a cable that acts like a chain.

Always the right length - for ladders, power tools, generators, air compressors, tool boxes, trailer cargo, car top carriers, bikes, boats, lawn equipment, and more!

- Infinite Locking Positions
- Cut Resistant 3/8" braided steel cable
- Vinyl cable sleeve and lock body bumper
- Weather Tough Aluminum alloy lock, cylinder shutter, and vinyl-coated cable
- Patented wafer cylinder
- Velcro straps hold excess cable in place.

KD (Keyed Different) is Retail Carded with Bilingual (English/Spanish) Series Packaging

How can you avoid having your lock cut off during air travel?

Use the new Master Lock TSA-Accepted resettable combination lock.

The new Travel Sentry™ Luggage Locks

Certified combination padlock, recognized by Transportation Security Administration (TSA) security agents as an acceptable luggage lock for all travel security needs.

The unique Travel Sentry logo indicates to TSA screeners that they can use a secure set of codes and tools to unlock, inspect, and relock travelers' baggage, without cutting the lock.

Features:

- 3-dial Set-Your-Own combination convenience
 - Sturdy metal construction
 - Side window for easy viewing
 - Exclusive design with upscale traveler appeal
 - Lifetime guarantee
- 1-13/16" (30mm), 1/8" shackle, 3/4" shackle clearance; 1/2" shackle width

Master Lock

Whether you ride the water, snow, dirt or roads, don't play the odds when you park your power sport vehicle. Protect your investment, latch on to Master Lock's Street Smart patented security products.

Street Cuffs®

Without a fixed anchor point for leverage and virtually no space for jacks, there just isn't an easy way to defeat the Street Cuff.

- Compact and lightweight - easily fit in cargo areas
- 3" (8cm) cuffs fit fork legs or frames; can be secured to sign posts, parking meters, or another bike.
- Push button keyless locking convenience
- Heat treated patented lock core is virtually pick proof
- Pivoting action combined with 22" (55cm) length provides lockdown versatility.

8290DPS

- Hardened, chrome plated steel resists cutting and prying.
- Fold in half for convenient storage.

Street Cuff Holster

- Full grain leather holster provides storage and easy access for the 8290DPS cuff lock.
- Compact for comfort and convenience
- Heavy duty snap holds securely while riding.

SCHLAGE Portable Security

Shrouded Steel Padlocks

- Case Hardened Solid Steel Body Resists Impact
- Molybdenum Hardened Steel Shackle offers greater cut resistance
- Meets or exceeds ASTM standards for standard steel shackle, shackle cutting and corrosion resistance.
- Double Deadbolt Locking Mechanism for extra security
- Patented Interchangeable Shackle design, easy disassembly
- Shrouded padlocks provide increased cut resistance
- Standard Cylinder Features include:
 - * **SFIC** 7 pin - Less Cylinder. Compatible with Schlage, Falcon, Best, Master Lock, and Arrow
 - * **FSIC** Full Size Interchangeable Core - Less Cylinder

KS82M: 1-13/16" W x 3-7/16" H x 1-3/32" D Body
SZ92M: 2-1/8" W x 3-7/16" H x 1-3/16" D Body

Order #	Item #	Cyl	Shackle	Cat. Price
744-0090	KS82M1200	*SFIC	5/16"	59.04
744-0095	KS92M3200	*FSIC	3/8"	78.24

Locking Cables

- Braided Steel Vinyl Coated Cable.
- Integrated zinc locking head.
- Standard Cylinder Features include:
 - * **KNK** Schlage Conventional Key-In-Knob Cylinder
6-Pin Solid Brass Cylinder (pinned 5).
Keyed different, Two Nickel Silver Cut Keys
 - * **SFIC** 7 pin - Less Cylinder. Compatible with Schlage, Falcon, Best, Master Lock, and Arrow

Diameter for All: 5/8"

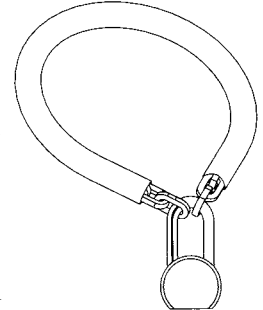

Order #	Item #			
744-0100	KC215E220	6'	KNK Sch C KD	\$89.40
744-0105	KC215E230	6'	KNK, less Cyl	67.44
744-0110	KC215B130	4'	SFIC, less Cyl	61.92
744-0115	KC215E130	6'	SFIC, less Cyl	67.44

Cable Locks

SCHLAGE Portable Security

Vinyl Covered Chains with Padlock

- Triple Heat-Treated Boron Manganese Steel Chain
- Unique Trapezoidal-Shaped Chain Links for Maximum Cut resistance
- Features KS72F2300 Solid Steel Round Padlock.
- Standard Cylinder Features include,
 - * **KNK** Schlage Conventional Key-In-Knob Cylinder
6-Pin Solid Brass Cylinder (pinned 5). Keyed different
Two Nickel Silver Cut Keys

Schlage C Keyway, Keyed Different

Order #	Item #	Length	Catalog Price
